

SKIN CARE INGREDIENT POWERED BY ANCIENT WISDOM

ImmulinK SR™ powder is a natural polymer known as beta glucan, which is extracted from Reishi mushrooms. This polymer works by activating Langerhans cells, a dense network of immune system sentinels that play a significant role in the natural healing process of the skin.

Beta glucan is a remarkable molecule that serves as a shield and restoration agent. It provides a shield to the skin by supporting the protective function of Langerhans cells while simultaneously expediting the skin's recovery process. With a precisely designed molecular weight, ImmulinK SR™ exhibits remarkable water-binding capabilities, thereby intensifying moisturization. Upon topical application, ImmulinK SR™ quickly permeates the skin, where it is promptly absorbed by the immune system. This, in turn, initiates a process of ridding the skin of unwanted biological agents or dead cells while promoting the restoration of collagen structures, thus visibly reducing fine lines and wrinkles.

INCI Name: Beta glucan, CAS#: 1439905-59-4/ 53238-80-5 / 55965-23-6

Properties: Immulink SR™ powder offers a natural way to infuse the calming influence of mushrooms into an array of cosmetics and personal care products. The organic powder is extracted from Reishi mushrooms and provides the scientifically verified benefits of beta 1,3/1,6 D-glucan to a wide range of product formulations.

Immulink SR™ powder has a natural affinity for dissolving in water and glycerin, rendering it a prime component for both new and pre-existing formulations.

Parameter	Specifications
Appearance	Fine light beige powder
Odor	None
Beta 1,3/1,6 D-Glucan	> 70%
Fat	< 1%
Protein	< 1%
Water Solubility	> 95%

Product Applications: Serums, Creams, Gels, Anti-Aging products, Sunscreen, Soaps, Lotions, Ointments, Facial Masks, Toners, Shaving products, Conditioners and Shampoo.

Direction for Use: For topical/external use only. Use levels: 0.5% - 10%. Add to water phase of formula.

Packing: 20 Kg box

Formulation Benefits: Stimulates collagen synthesis, provides protection against hyperpigmentation, promotes cell renewal & anti-aging, improves skin hydration & viscoelasticity and reduces scarring and fine lines.

Storage: Ambient condition away from moisture and direct sunlight.

Product Safety/Certifications:

- FDA-Notified GRAS (GRN000413)
- Certified Organic • Allergen free
- GMO free • Certified Kosher/HALAL
